NEWS & UPDATES

- We have learned of many billing issues in recent weeks. We are genuinely sorry for this inconvenience. We have spent extensive time trying to get to the bottom of this for you guys. We feel that we have a process in place to speed things up. Please see the billing FAQ on our website and attached to this email on what we can do. Thank you for being a partner in saving lives. – Carolyn
- **NDCRCI Orientation** is posted on the [QHA website](#) for new enrolled sites. Watch the video to learn more about referrals, billing, and how to use the program. If you would like to schedule an orientation for your clinic, please email: ndcrc@qualityhealthnd.org

RESOURCES

- **Rural Guide Book**
People living in rural, remote, and frontier settings face a higher burden of colorectal cancer, as well as unique barriers to cancer screenings when compared to non-rural residents. We're proud to have partnered with the American Cancer Society National Colorectal Cancer Roundtable to help develop the new resource, **Increasing Colorectal Cancer Screening in Rural Communities: A Practical Guide**. Designed to support key community and clinical partners in understanding and overcoming the unique challenges and common barriers to screening, the guidebook features recommended tactics, case studies, templates and tools to support your work: www.nccrt.org/ruralguidebook
- **Troubleshooting your billing issues:** Check out new NDCRCI Resource [here](#)
- Check out the SreenD Impact report that highlights the work that was done to increase CRC screening rates in ND. > [SreenD](#)
- Are you screening enough patients? Use [this calculator](#) to determine if you are on track or not.
